**Photo Slideshow
 Planning Form**

GETTING STARTED

- ▶ Print this page to plan your video.
- ▶ Choose your music first. You can provide the music on CD or mp3 files.
- ▶ As a general rule, use 10 photos per minute of music, but you can vary this as you like. We will edit your photos to fit the music.
- ▶ Organize your music and photos before numbering.
- ▶ **OPTION 1:** Number each photo on the back in the lower corner (never the center). Use a pencil or ballpoint pen (**never use a marker or gel pen**). Each photo must have a unique, sequential number on the back (can't have two #12 photos). Avoid using paper clips.
- ▶ **OPTION 2:** If you would prefer to have all the photos appear randomly, then there's no need to number them.
- ▶ For digital photo files, rename each filename with the number of its position in your video. Digital images can be sent on a USB drive or via a file sharing service like Dropbox.
- ▶ For more info on slideshows and other photo options, visit www.VideoMVP.com.
